Hi Beth, Thanks so much for digging this up for me. I took a quick peek and seems like it should fill in some gaps.

I'm still looking for copies of any periodic sampling results were taken (like the 2011 data that you forwarded) to confirm that the POEs were working as designed.

I see that Mountaire replaced a faulty treatment system in a home that had its own treatment system pre Order. Do you recall the circumstances of identifying that the system wasn't effective? Because from the info you sent it looks like a sample taken on 2/16/11 was below the MCL and was deemed unrepairable by October 2011.

I just want to follow-up with what you said this morning that recent samples were taken at the POE homes, especially the Ex. 6 - Personal Privacy house that had a sample taken pre-treatment

Subject: info

Hi Amy,

I sifted through the old files. I hope this helps.

Call me if you need me to look for more specifics. There are a lot of old salt delivery receipts, but they are cumbersome.

Thanks,

Beth
